# SAL — Public Knowledge Package

## 1. Purpose of This Folder

This Google Drive contains the public, descriptive knowledge base developed within the SAL (Sentinel Agro Labs) project.

Its purpose is to document EU-relevant agricultural monitoring domains in a reviewer-safe, non-operational form.

This material is not a software system, not a decision-support tool, and not an operational platform.

––––––––––––––––––––

## 2. Scope and Boundaries

All documents in this folder are: - Descriptive only - Based on publicly available EU, UN, and institutional sources - Free of thresholds, scoring, forecasting, or recommendations

Explicitly excluded: - AI-driven analysis - Predictive modelling - Farm-level recommendations - Policy optimisation

––––––––––––––––––––

## 3. Folder Structure Overview

### 01_Overview

High-level overview PDFs.

### 02_Knowledge_Notes

Domain-specific knowledge notes: - Drought & climate indicators - Soil moisture monitoring - Statistical agriculture - Vegetation phenology & productivity (HR-VPP)

### 03_Contextual_Notes

Supporting context, datasets, classifications, and citations.

### 99_Archive

Archived or superseded materials.

––––––––––––––––––––

## 4. Provenance and Versioning

All documents are exported from an internal knowledge base and reflect the state of knowledge as of December 2025.

---

## 5. Positioning Statement

The SAL public knowledge package supports transparency and structured documentation only.

No operational or advisory use is implied.
