

Citation Record

Source Identification

- Title: Computers and Electronics in Agriculture
- Authors / Organization: Editorial Board (journal)
- Year: Ongoing
- Publication / Source: Scientific journal
- Publisher / Issuing body: Elsevier
- URL / DOI: <https://www.sciencedirect.com/journal/computers-and-electronics-in-agriculture>

Classification

- Source type: journal
- Region relevance: Global / EU
- Domain tags: soil, crops, sensing, precision agriculture, data systems

Scope & Context

- Intended scope (from source): Publishes research on the application of computers, electronics, and information technologies in agriculture and related fields.
- Agricultural relevance: Covers digital and computational methods applied across agricultural production systems.
- Environmental / soil relevance: Includes soil monitoring, land evaluation, and environmental sensing topics.

Notes (Neutral, Descriptive Only)

- Peer-reviewed journal serving as a publication venue for research on digital and computational technologies applied to agriculture.
